About Us

Bamboolutions

Company Intro

Since 2013

Bamboolutions Global Ltd was founded to bring innovative bamboo fiber disposable tableware and food packaging solutions to international markets, offering high-quality, eco-friendly alternatives to traditional disposable tableware and food packaging products.

With over 12 years of manufacturing experience, we've developed patented technologies through extensive R&D to advance the use of bamboo fiber in sustainable food packaging.

Our products are fully biodegradable, non-toxic, and outperform plastic, paper, and bagasse alternatives in durability, heat resistance, and moisture protection. Backed by a fully integrated supply chain—from bamboo plantations to production—we maintain complete control over quality and sustainability.

Why You Should Choose Us?

From Bamboo to Your Table:
Integrated Sustainable Disposable
Tableware and Food Packaging
Solutions.

Bamboo Forest

Our raw materials are sourced directly from our 27 km² privately-owned bamboo plantations. With an additional 200 km² of bamboo resources from local government quota.

Bamboo Fiber Plant

Zero-waste production: 180,000-ton annual capacity. All by-products are repurposed into liquid fertilizer, significantly reducing resource waste and environmental impact.

Bamboo Fiber Molding Factory

state-of-the-art facility spans over 110,000 square meters and houses 180 fully automated production machines. With an annual production capacity of 120,000 tons

Global Reach

Through Bamboolutions Global Ltd, we deliver tailored disposable tableware and food packaging solutions to 50+ countries

Our Sustainable Practices

Bamboolutions

We prioritize sustainability in every aspect of our business, from responsible bamboo cultivating to energy-efficient, zero-waste manufacturing processes.

Sustainable Raw material

Water & Waste Management

Renewable Energy

Support Local Communities

Our integrated system reinforces the long-term sustainability of the bamboo industry while providing stable employment for thousands of rural workers in Hunan and Guangdong provinces.
